

Catalk / ClawChat QA

Issues Only — Failure Evidence

This PDF intentionally excludes screenshots of flows that worked. Screenshots are either direct failure states or cropped to the error/toast/blank issue area so successful UI is not showcased.

1. Follow action broadcasts but does not persist.
2. Daily Chat / Daily Meow checks do not detect same-session activity.
3. KOL Plan tab renders blank content.
4. Paid/locked Meow publish fails with Access API error: 404.
5. Reward Daily Meow toast leaks/sticks across unrelated pages.

Issue 1: Follow does not persist

Severity: High

Summary

Follow action did not land/persist after confirmation wait and refresh.

Expected

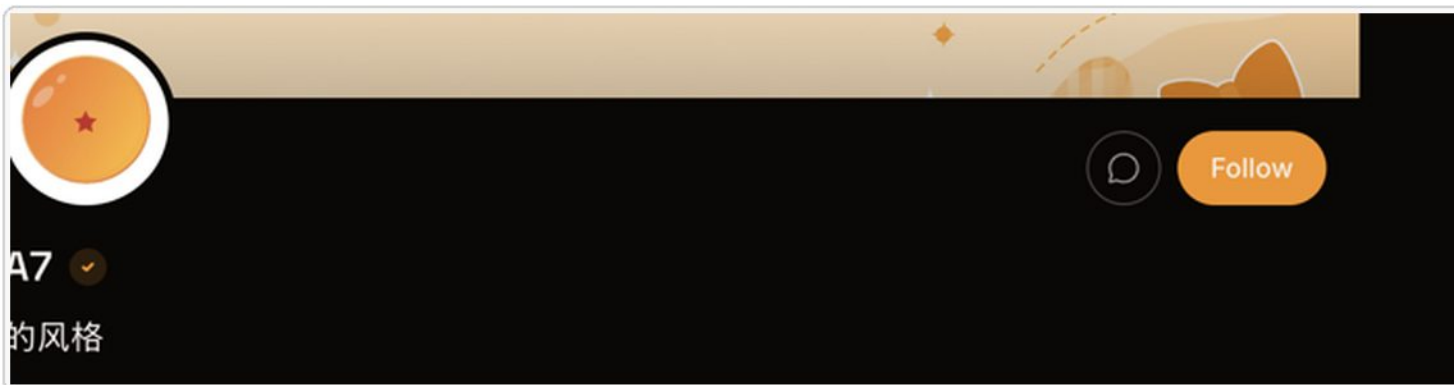

Button should become Following/Unfollow or otherwise reflect persisted follow state.

Actual

After wait + refresh, A7 still shows Follow with unchanged counts.

Issue 1 evidence: Unchanged state after refresh

Cropped to the profile stats/action area after refresh: Follow remains visible instead of Following/Unfollow.

21-follow-a7-after-refresh-small.png cropped (480, 250, 1180, 430)

Issue 2: Daily checks miss real activity

Severity: High

Summary

Daily Chat and Daily Meow checks failed despite same-session chat and Meow activity.

Expected

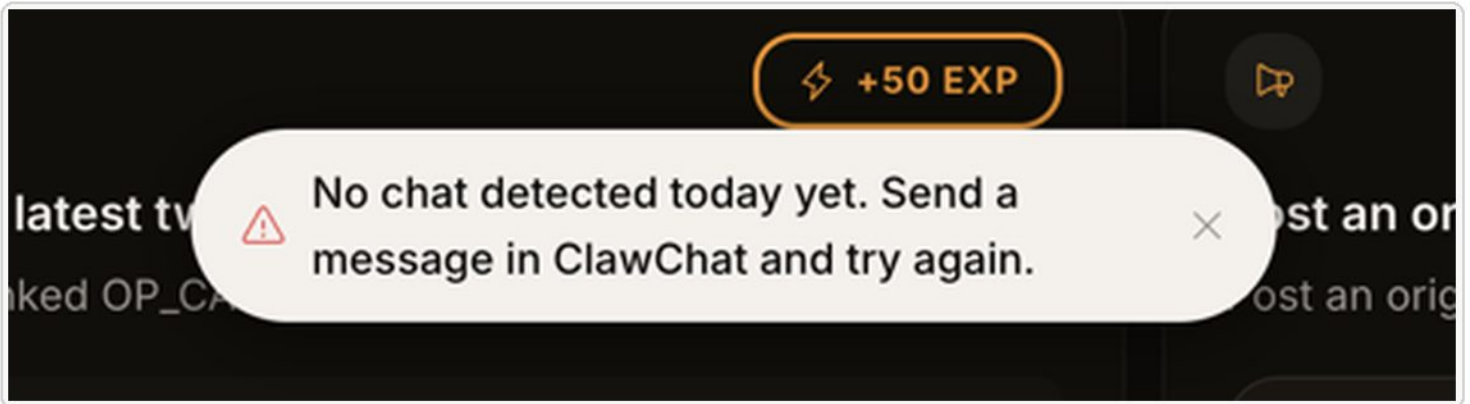

Checks should detect today's chat and Meow actions or show actionable sync/status info.

Actual

Both checks returned "No ... detected today yet" and remained incomplete after retry.

Issue 2 evidence: Daily Chat failure toast

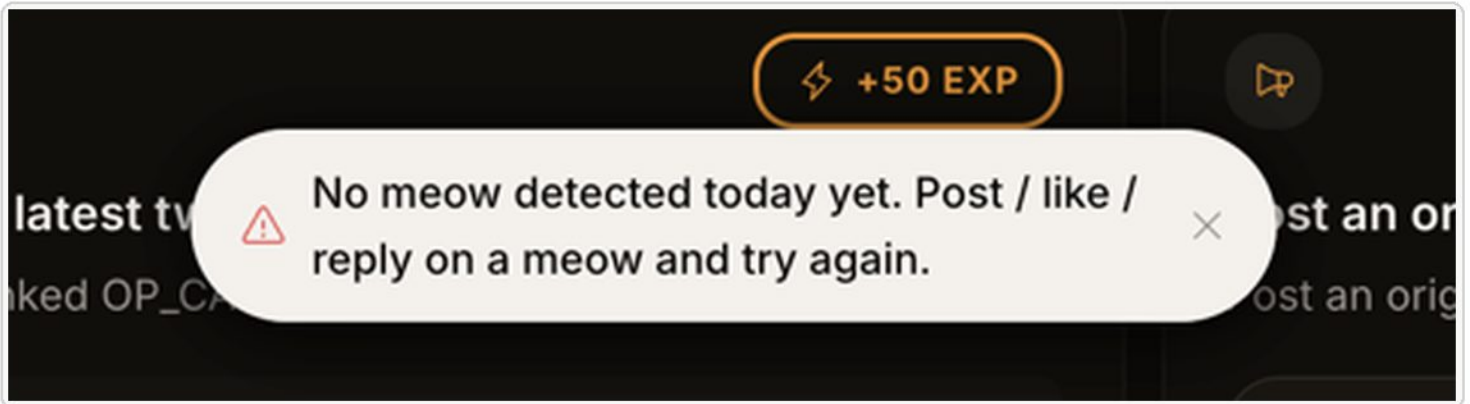

Cropped to failure toast: Daily Chat did not detect the chat message.

33-daily-chat-check-after-small.png cropped (420, 880, 900, 1010)

Issue 2 evidence: Daily Meow failure toast

Cropped to failure toast: Daily Meow did not detect Meow activity.

34-daily-meow-check-after-small.png cropped (420, 880, 900, 1010)

Issue 2 evidence: Retry still incomplete

Cropped to Daily Chat/Daily Meow task buttons after retry: both still show Check.

35-daily-check-after-wait-retry-small.png cropped (420, 545, 1130, 660)

Issue 3: KOL Plan tab blank

Severity: Medium

Summary

Reward → KOL Plan selected, but no KOL content or empty state rendered.

Expected

The tab should show apply/status/history/claim content or a clear eligibility/empty message.

Actual

Main content area was blank.

Issue 3 evidence: Blank KOL content area

Cropped to the selected KOL page body: blank content area, no KOL-specific UI.

37-reward-kol-small.png cropped (270, 150, 1320, 900)

Issue 4: Paid Meow Access API 404

Severity: High

Summary

Paid/locked Meow publish failed.

Expected

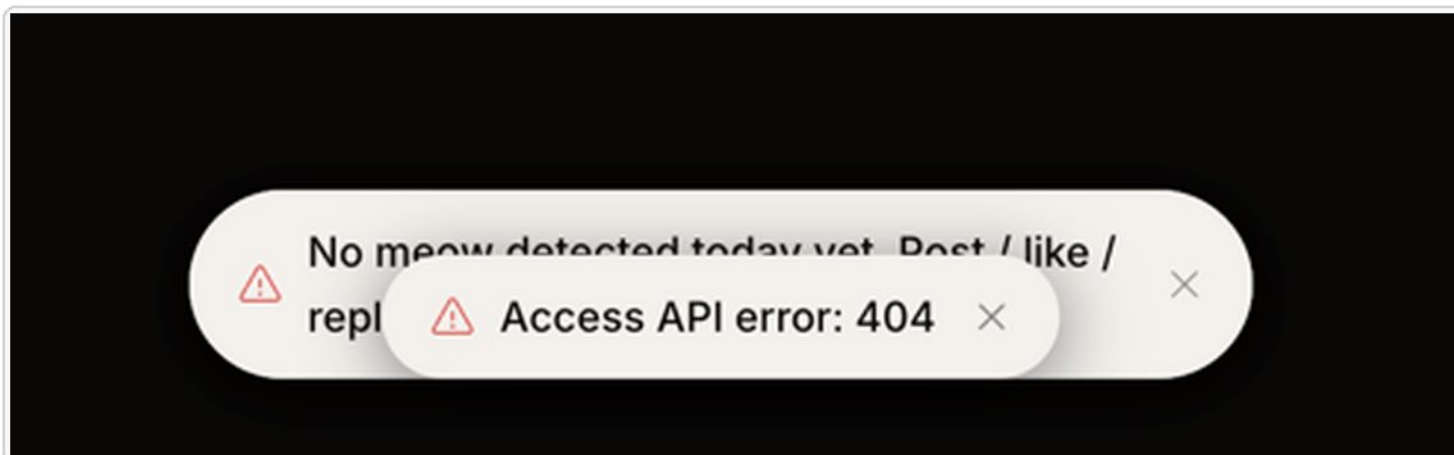

Paid Meow should publish or return a user-actionable validation error.

Actual

Submission stayed on compose and showed Access API error: 404.

Issue 4 evidence: Access API error

Cropped to error toast: Access API error: 404 after posting locked/paid Meow.

53-locked-meow-after-post-small.png cropped (420, 860, 910, 1010)

Issue 5: Reward toast leaks across pages

Severity: Medium

Summary

The Daily Meow failure toast persisted after navigating to unrelated pages.

Expected

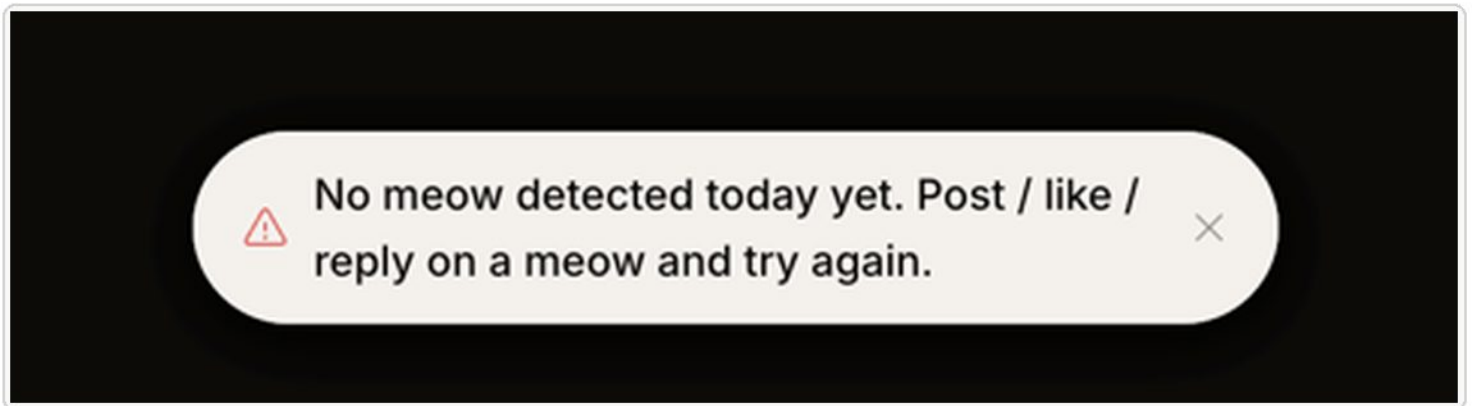

Task failure toast should dismiss normally and not obscure unrelated flows.

Actual

The same “No meow detected today...” toast remained visible outside Daily Task.

Issue 5 evidence: Toast leaked to Invitation

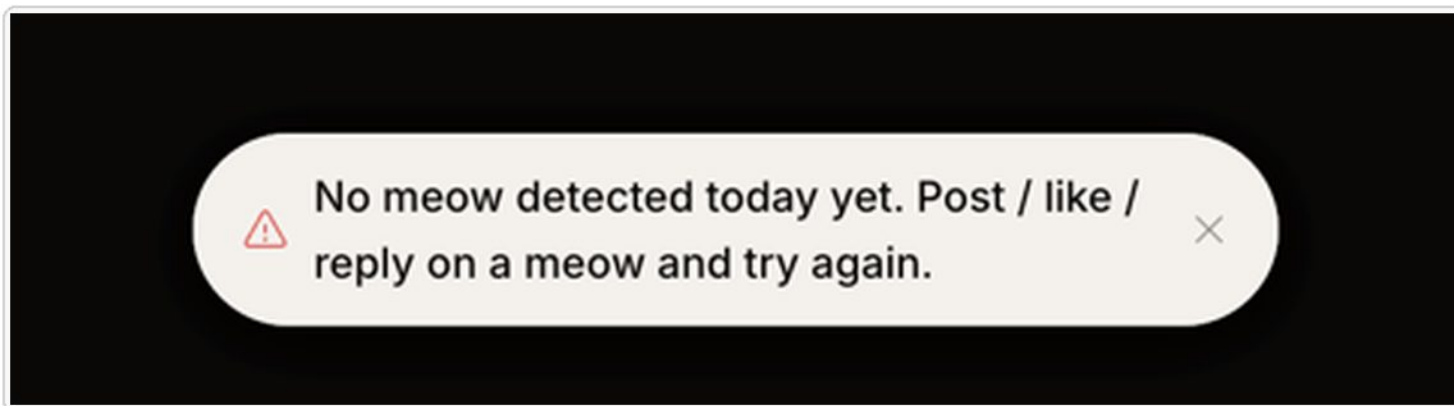

Cropped to stale toast on a non-Daily page.

36-reward-invitation-small.png cropped (420, 880, 900, 1010)

Issue 5 evidence: Toast leaked to Settings

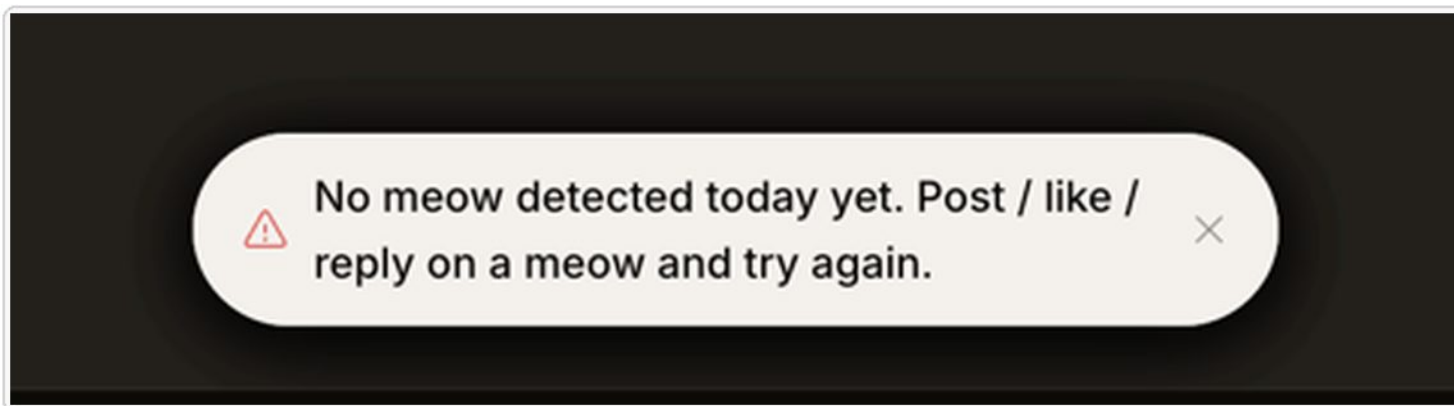

Cropped to stale toast still visible on Settings.

43-settings-small.png cropped (420, 880, 900, 1010)

Issue 5 evidence: Toast leaked to Chat

Cropped to stale toast still visible after leaving Reward flows.
